PROFESSIONAL EXPERIENCE

Click Melon Media Pvt. Ltd.

Mar 2025 – Apr 2026

Software Engineer

Noida, India

- Engineered and launched Compare Vidya, a full-stack EdTech platform that **contributed to INR 1Cr+ revenue** within three months, achieved **90+ Lighthouse performance scores**, and attracted **1,000+ monthly organic users**.
- Generated **2,100+ leads/month** across 4 client platforms by building 10+ ad-optimized landing pages integrated with Meta ads, Google Ads, Google Forms, and Sheets API – directly supporting **90+ confirmed university admissions**.
- Eliminated developer dependency for the SEO team by building a CMS-driven blog system with RBAC, enabling independent content publishing and reducing content deployment time from days to minutes.
- Modernized three legacy WordPress platforms by rebuilding them with React.js and Node.js, increasing **lead generation by 2–3x** and enabling **INR 5L+ monthly affiliate revenue**.

PROJECTS

Offerly — Scalable Affiliate Tracking SaaS

offerly-sigma.vercel.app/login | github.com/Ritik2513/Offerly

Tech: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Redis, Docker, BullMQ

- Architected and developed Offerly, a production-grade affiliate tracking SaaS built with React.js, Node.js, MongoDB, Redis, and BullMQ for campaign monitoring, conversion attribution, and payout management.
- Built high-throughput event-processing pipelines using Redis queues and BullMQ workers, enabling reliable click capture and Server-to-Server (S2S) postback handling under concurrent traffic.
- Delivered role-based authentication, campaign workflows, and real-time analytics dashboards for affiliates, advertisers, and administrators.

react-gsap-effects – Open-Source npm Package

npmjs.com/package/react-gsap-effects | github.com/Ritik2513/react-gsap-effects

Tech: React.js, TypeScript, GSAP

- Published react-gsap-effects, an open-source npm package delivering reusable React + TypeScript animation primitives built on GSAP, eliminating repetitive boilerplate for developers; **534+ monthly downloads**.
- Designed a type-safe, composable API (TextReveal) supporting JSX children for granular, flexible control over text and UI motion effects, deployed on personal and client-facing sites.
- Structured around a peer-dependency architecture (React 18+, GSAP 3+), with a public roadmap of 9+ planned additions (ScrollReveal, MagneticButton, ParallaxImage, etc.), maintained with docs and a live interactive demo.

Compare Vidya — EdTech College Comparison Platform (Production)

comparevidya.com

Tech: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Framer Motion

- Enhanced frontend performance through lazy loading, code splitting, asset optimization, and semantic HTML, **increasing Lighthouse Performance from 58 to 90+ and SEO from 92 to 100**.
- Built 8+ backend modules using Node.js and Express.js, implementing RBAC authorization, JWT-based authentication, and secure cookie-based session management across production deployments.
- Enabled dynamic university and course management workflows through a CMS-driven architecture, allowing non-technical teams to manage platform content independently.
